

Having the corporate benefit of the SNOO waiting for us when we got home was such a blessing, we didn't even realize we needed until we came home with our baby. As new parents, the SNOO helped baby sleep, so we could sleep!

-Marykay T, Metairie, LA, Communications Specialist, Children's Hospital of New Orleans

We were afraid we'd never want to give the rental back! Around 5 months though she was ready to move to crib and the transition was easy. Receiving and returning the SNOO was also easy, and now we don't have to worry about storing it for our next baby.

-Attorney, New York City

This was my third baby, so I was skeptical. But I have to say, SNOO lived up to the hype. Starting from 3 weeks through 6 weeks, my baby was sleeping an average of 8+ hour stretches through the night and then averaging 9-10 hours per night after that through 5 months. From a sleep/wellness perspective, the SNOO made it much more manageable to return to work and feel like I could still perform at my best.

- AGB, Attorney, New York City

SNOO's ability to extend sleep definitely improved my sanity during maternity leave and going back to work. When I was exhausted, I definitely had moments of postpartum depression. When I was well rested, I felt happier, more mindful and more productive at work.

-Stephanie Bevegni, Manager of Brand Marketing, Cruise (a GM Company)

SNOO is THE most amazing invention EVER. I could actually cry (and I have!) thinking about how amazing the SNOO is. Our little girl absolutely loves it, at 6 weeks old she already sleeps 5-6 hour stretches at night.

-Rebecca, Creative Strategist, Facebook

I have used SNOO for 2 out of my 3 kids and noticed a big difference in managing my post-partum anxiety/intrusive thoughts when using SNOO because I have peace of mind my baby is safe.

-Marvell Technologies Employee

The extra sleep we got each day using the SNOO made the entire newborn stage so much more enjoyable. The SNOO allowed us to practice falling asleep independently so effortlessly so he could learn to fall asleep on his own. I was terrified to wean him off the SNOO because it was so beneficial for helping him sleep, but when he was ready, it was a breeze.

-Leanna Lilly, Sr. Benefits Manager, Total Rewards, ServiceTitan

I can honestly say the SNOO was one of the best products we used with our newborn. Not only did it help our little one sleep longer stretches throughout the night, getting nights of 7 consecutive hours by around 2 months old, but we were able to confidently put our baby down for a nap and sleep knowing she was safely secured in her swaddle. I have already and will continue to recommend the SNOO to new parents!

-Sarah, Sonic Drive-in

Having the SNOO gave me the peace of mind that my baby was in a safe sleeping position, and the SNOO helped put her back to sleep when she woke up, so I didn't have to.

-Stephanie, Sr Manager, People Team, Los Angeles, CA

After having my first baby, I can say that our workplace SNOO rental is easily the best benefit my job offers. Our SNOO has made it easier to implement a routine and to get our daughter sleeping through the night, which means I was much more relaxed and rested returning to work. My husband has even joked that I have to stay with my current employer forever simply so we can rent the SNOO again for our next baby.

-Samantha S., Senior Lead Creative, Baltimore MD
